

About Us

The Dartmouth Refinery dock operates 24 hours per day, 7 days a week. Vessels can obtain MGO and IFO grades supplied by barge or pipeline, and MGO by truck. The 3400MT barge is owned and operated by a third party for the exclusive use of Imperial Oil.

PORT OF HALIFAX:

The Port of Halifax is strategically located along major shipping lanes as the first inbound port and last outbound port on the North American continent. With excellent inland connections and a variety of improvement projects currently underway, the Port of Halifax is well positioned to accommodate even the largest container vessels.
