

About Us

Imperial Oil services the St. Lawrence region 24 hours a day, seven days a week with fuel deliveries made via pipeline or truck. A wide range of products are offered to suit each customer's unique needs.

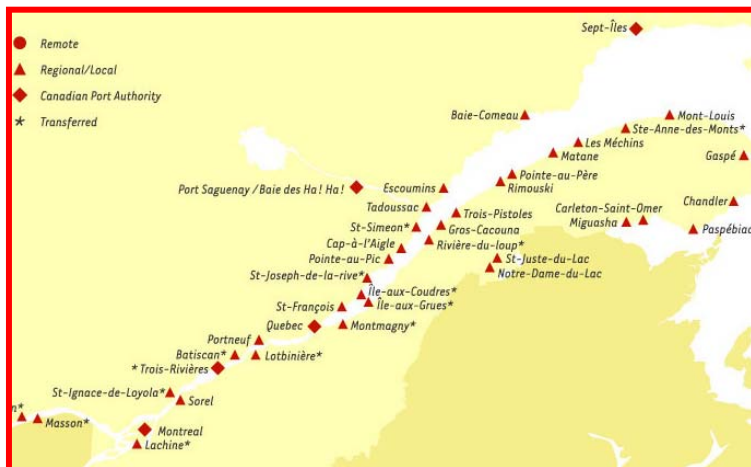

The international ports of the St. Lawrence/Great Lakes region are the gateway to the industrial heartland of North America; the Port of Montreal alone handles over 20 million tonnes of highly-diversified cargo a year. The region welcomes both cargo and passenger ships and provides all methods of inland transportation.
